STERGIOS KATSOGIANNIS

Software Developer

👤 Softwear Enginnering

An enthusiastic Software Engineering Student, a hobbyist programmer paving his way towards a career change through a Bachelor Degree. Serving as a Science Teacher/Physics Specialist in Secondary Education for the last 13 years, never stopped building several software side projects either to incorporate in the curriculum, or as utilities for my work, or mostly just for fun. Competent in various platforms, programming languages and frameworks. Excellent communication and collaboration skills. Eager to apply and expand my skills over challenges in real-life problems through an internship or even a full-time job as a Software Developer.
